

MOTOR MOUNTS, TRI-ARM/QUAD-ARM BRACKETS AND CUSHION BEARINGS

Designed for the HVAC industry, Triangle Manufacturing's motor mounts, cushion mounted bearings and tri-/quad-arm brackets are highly regarded within the industry for their noise dampening effect and ease of installation.

MOTOR MOUNTS

Manufactured to dampen vibrations, each leg of the motor mount can include rubber footings and can be configured in length and gauge to accommodate nearly any fan blade diameter.

Motor mounts are available with:

- Rubber footings
- Customizable footing length and gauges
- Special order steel ferrules

Expertly designed and manufactured, featuring:

- More than 40 sizes of belly bands available to fit different motor mount legs
Belly bands are shipped unassembled to minimize costs
- Unique, easy to use and affordable motor mount system
- Assemble fixture available

TRI-ARM AND QUAD-ARM BRACKETS

Available in three- or four-arm styles, our brackets are designed for the HVAC industry to facilitate accurate positioning of the shaft and blower wheel through its self-centering and self-aligning design.

Arm brackets are available with:

- Three- or four-arm configurations
- Customizable lengths and gauges for maximum flexibility
- Five different bearing socket sizes

Expertly designed and manufactured, featuring:

- Preassembled or unassembled shipping to meet customer requirements
- Welded or crimped assembly available
